Tripitaka — Chinese

A most remarkable enterprise of Japanese Scholars in the publication of Buddhist Literature.

A **New Series** of *Tripitaka in Chinese*

compiled and published by a special committee, including the most learned Buddhist Scholars of Japan, under the chairmanship of the Reverend Dr. *Yeun Maeda*, Mr. *Tatsuye Nakano* acting as Editor in Chief.

Previous editions of the Tripitaka in Chinese contain only the Sacred Books of Indian Buddhism, and not all of them. Exclusive of these, are a number of Chinese translations, most of which have been handed down in manuscript and reverently preserved in old temples and the libraries of celebrated Japanese and Chinese bibliophiles. Among them are valuable works on the Sutras, the Vinayas, the Abidharmas and the Mystery Rituals of Indian Buddhism, all of which are now produced in this new Series.

The most noteworthy feature of this new series is the complete compilation of the works of venerable and celebrated priests and scholars of China, on the philosophical doctrines, ethics, history and ritual of Chinese Buddhism.

We wish to call special attention to the facts, that most of these works have been preserved in manuscript only, and hence are not only unknown to Western scholars but also have been hitherto inaccessible even to Japanese and Chinese students, and that the series serves as a sort of supplement to the old series, the knowledge of which will not be complete without the reference to this series.

The Committee has spent more than ten years upon their task which would have been impossible without the cordial approval and co-operation of the High Priests of the old temples and those bibliophiles who have kindly lent manuscripts from their treasured stores. The work was finished in November, 1912; and the Committee, after their great efforts, *are proud to offer to the scholars of the world this convenient edition of old works which will throw new light npon the research into the spiritual development of the Far East.*

This Tripitaka is the greatest cyclopedia of Buddhistic knowledge. It contains more than 1700 works in 7140 volumes, dating from over fifteen hundred years ago. These works are classified in ten parts and sixty-three groups, in each of which chronological arrangement is

followed for greater convenience in historical study.
